WORK EXPERIENCE

Consultant

Netcompany

📅 March 2024 – Currently

📍 Copenhagen, Denmark

Worked on "Housing Benefits", a national system supporting Danish citizens with rental assistance.

- Began as a core member of the maintenance team, resolving incidents, coding fixes, and enhancing features within the Java Spring Boot-based system.
- Progressed to Team Lead within 18 months, demonstrating strong technical ownership and leadership capabilities.
- Lead daily communication with the client, facilitating workshops and participating in planning and prioritization meetings, including frequent on-site collaboration at the client's office in Denmark.
- Managed batch job monitoring and resolution, including on-call duties, to ensure reliable system operations.

Software Engineer - Developer

Human Asset

📅 Jul 2023 – Mar 2024

📍 Athens, Greece

Worked on diverse projects for multiple clients, primarily focused on software development, including web applications and AI prototypes.

Work on Web Applications

- Worked on diverse projects for multiple clients, primarily focused on web application development.
- Designed and developed back-end applications using Node.js and Express.js, implementing server-side logic and APIs.
- Designed and built the database using SQL, modeling data structures with Sequelize to ensure efficient and maintainable data management.

Work on Developing AI Prototypes

- Built AI and LLM prototypes with LangChain, integrating language models into applications.
- Developed AI avatar prototypes in Unity Engine, incorporating speech-to-text and text-to-speech functionality.

EDUCATION

Master of Engineering (M.Eng.) - Computer Engineering & Informatics

University of Patras - 2015 - 2023

- **Thesis:** Designed and developed a VR educational escape room on the theme of sound, in collaboration with the Science and Technology Museum of the University of Patras. Built using Unreal Engine and tools like Blender, the project was released for Oculus Quest 1/2.

RESEARCH

- **Spatial Audio Cues in an Immersive VR STEM Escape Room Game: A Comparative Study** - Investigated the impact of spatial audio cues in a VR STEM escape room, showing improved object localization and enhanced spatial auditory awareness. Presented at iLRN 2024 Conference and awarded Best Academic Full Paper.

ACHIEVEMENTS & TECHNICAL SKILLS

- **Auxiliary Work** - Offered assistant to teacher in the academic course Databases & SQL
- **Microsoft Student Ambassador** - Active member for 2 years, participated in workshops and delivered presentations as a speaker.
- **Java Spring Boot, Javascript, NodeJS, expressJS, React, Databases - SQL, Fullstack**

PERSONAL SKILLS

- **Rapid learner & problem solver:** quickly adapts to new technologies and resolves complex issues.
- **Leadership & teamwork:** strong team spirit, social, and capable of leading and collaborating effectively.
